CERTIFICATION

Employment certified by Red Cloud ICT Solutions (Doc. No. WXP-00205-26, 9 Sep 2026). Original certificate and Work Experience Detail are attached on the following pages.

PROFESSIONAL SUMMARY

Experienced ERP Developer and Web Development Section Head with 5+ years in software development, combining hands-on engineering with technical leadership. Proven track record developing, customizing and implementing scalable ERP and enterprise web solutions for diverse customers, adapting software to different organizational structures, business processes, workflows and reporting needs. Skilled across the full software development life cycle, from requirements analysis to deployment and post-implementation support, while leading and mentoring development teams.

PROFESSIONAL EXPERIENCE

Web Development Section Head

Aug 2023 – Present

Red Cloud ICT Solutions · Addis Ababa

Permanent employee, Software Development Department (Employee Code E-0533). Hands-on technical lead combining team leadership with direct involvement in analysis, design, development, testing and deployment.

Software & ERP Development

- Participate in the complete SDLC: requirements analysis, design, development, testing, deployment and maintenance.
- Develop and customize web-based enterprise applications and ERP systems; build new functionality and extend existing modules.
- Implement customer-specific business rules, workflows, approval processes, forms, reports and dashboards.
- Contribute to ERP solutions covering finance, HR, sales, procurement, inventory, production and other operations.
- Integrate ERP modules and enterprise applications so transactions and information flow across departments.
- Build database-driven applications, APIs and business services; perform testing, debugging and performance tuning.

ERP Implementation for Different Customers

- Gather and analyze requirements, study existing processes and identify automation opportunities.
- Map requirements to ERP functionality, identify gaps and develop tailored custom solutions and modules.
- Support data migration and integration; run functional, integration and user acceptance testing.
- Take part in deployment and go-live, then provide post-implementation support and continuous enhancement.

Technical Leadership

- Lead and coordinate development teams; plan and assign tasks.
- Review designs, technical solutions and development work to drive quality.
- Mentor developers and help solve complex technical problems.
- Coordinate with project managers, customers and technical teams to support delivery.

Software Developer

Oct 2020 – Jul 2023

CNET Software Technologies · Addis Ababa

- Developed full ERP systems using .NET, integrating key business functions seamlessly.
- Built scalable e-commerce platforms using React and .NET C# for efficient online stores.
- Delivered diverse client web solutions using React, Node.js, SQL, MySQL and MongoDB.

WORK EXPERIENCE DETAIL

Official Certification of Employment & Professional Experience

EMPLOYEE NAME **Atseneh Abate Belay**	**EMPLOYEE CODE** **E-0533**
DEPARTMENT **Software Development**	**POSITION** **Web Development Section Head**

This is to certify that Mr. Atseneh Abate Belay, Employee Code E-0533, has been employed by Red Cloud ICT Solutions and has served in the Software Development Department, including in the position of Web Development Section Head.

During his employment with the company, Mr. Atseneh Abate Belay has gained extensive professional experience in software development, web application development, ERP development and customization, system analysis and design, enterprise application implementation, database development, system integration, testing, deployment, maintenance, and technical leadership.

Although he served as Web Development Section Head, his responsibilities were not limited to management and supervision. He maintained significant hands-on involvement in software development and implementation, participating directly in the analysis, design, development, customization, testing, deployment, troubleshooting, and enhancement of software systems.

A significant part of his professional experience has involved the development, customization, implementation, and support of ERP and enterprise management systems for different customers. His work required adapting software solutions to different organizational structures, business processes, workflows, reporting requirements, and customer-specific operational needs.

MAJOR DUTIES AND RESPONSIBILITIES

Software and ERP Development

- Participating in the complete Software Development Life Cycle (SDLC), from requirements analysis through design, development, testing, deployment, and maintenance.
- Analyzing customer requirements and translating business processes into functional and technical software solutions.
- Developing and customizing web-based enterprise applications and ERP systems.

RED CLOUD ICT SOLUTIONS PLC +2519 11 65 13 35

9978 redcloud@ethionet.et Coro, ICT Park Addis Ababa, Ethiopia.

- Developing new ERP functionalities and extending existing modules according to customer requirements.
- Implementing customer-specific business rules, workflows, approval processes, forms, reports, and dashboards.
- Participating in the development of ERP solutions covering major business areas such as finance, human resources, sales, procurement, inventory, production, and other enterprise operations.
- Customizing and integrating ERP modules to ensure that business transactions and information flow effectively between different departments.
- Developing database-driven applications and implementing supporting database structures, queries, procedures, and business logic.
- Participating in system integration between ERP modules and other enterprise applications.
- Developing and enhancing web applications, APIs, business services, and other application components.
- Conducting software testing, debugging, performance improvement, and defect resolution.
- Participating in data migration, system configuration, deployment, and production implementation activities.
- Providing technical support and implementing enhancements for ERP systems after deployment.

ERP Implementation for Different Customers

- Gathering and analyzing requirements from customers and end users.
- Studying existing business processes and identifying opportunities for automation.
- Mapping customer requirements to existing ERP functionality.
- Identifying functional gaps and developing appropriate custom solutions.
- Configuring and customizing ERP applications according to customer requirements.
- Developing additional functionalities and modules where required.
- Implementing customer-specific workflows, approval procedures, reports, and business rules.
- Supporting data migration and system integration activities.
- Conducting functional, integration, and user acceptance testing.
- Resolving issues identified during implementation and testing.
- Participating in deployment and go-live activities.
- Providing post-implementation technical support, maintenance, and continuous system enhancement.

Web Application and Enterprise Software Development

- Application architecture and technical design.

- Front-end and back-end development.
- Business logic implementation.
- Database design and development.
- API and system integration.
- Authentication, authorization, and role-based access control.
- Development of reports, dashboards, and business-process interfaces.
- Software testing and debugging.
- Application deployment and maintenance.
- Enhancement of existing enterprise applications.

Technical Leadership

- Leading and coordinating software development teams.
- Planning and assigning development tasks.
- Reviewing software designs and technical solutions.
- Providing technical guidance and mentorship to developers.
- Reviewing development work and supporting quality improvement.
- Assisting developers in solving complex technical problems.
- Coordinating development activities with project managers, customers, and other technical teams.
- Supporting software testing, deployment, maintenance, and project delivery.

OVERALL PROFESSIONAL EXPERIENCE

Throughout his employment with Red Cloud ICT Solutions, Mr. Atseneh Abate Belay has demonstrated strong professional experience combining hands-on software development with technical leadership.

His experience includes substantial involvement in the development, customization, integration, implementation, and maintenance of ERP and enterprise software solutions for different customers, as well as web application development and database-driven systems.

He has worked with diverse customer requirements and business processes and has contributed to transforming those requirements into functional and reliable software solutions. His experience covers the full software development and implementation process, including requirements analysis, system design, development, ERP customization, database development, integration, testing, deployment, troubleshooting, maintenance, and technical support.
